Republic, Washington

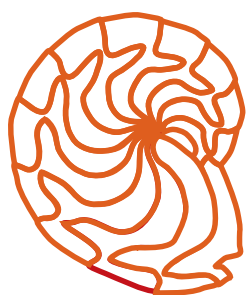

Celebrating 150 Years of Paleontological  
Search and Rescue in the Pacific Northwest

August 11, 2012

Saturday, 10:00am to 4:00pm

Rice NW Museum of Rocks and Minerals

26385 NW Groveland Drive, Hillsboro, Oregon

presented by the  
North America  
Research Group  
[nargpaleo.org](http://nargpaleo.org)

Encouraging responsible stewardship  
of Earth's paleontological resources;  
and to promote scientific research,  
communication, and public education.

**FREE ADMISSION**

*Including complimentary entrance into the world famous Rice collection of minerals.*

*Inspire, Inquire, Interact*

- Lectures on paleontology by local paleo dignitaries, including Dr. Jeff Myers, Western Oregon University.
- Activities for kids, including screening for shark teeth, a fossil hunt, and other educational games. Children won't go home without fossils!
- Fossil identification help.
- Displays of key fossil formations of the Pacific Northwest and the historical figures who researched them. See the progress of Wally the Whale, an ongoing NARG recovery project.
- Fossil preparation demonstrations and participation.
- See living plant fossils and take home seeds to grow your own!
